Prepare and format an abstract for MIP2024

Instructions: Abstracts should be prepared on a single side of A4 in English. Here are some guidelines for abstract preparation.

Margins: Please use a margin of at least 1cm on all sides of the paper.

Title: Centred at the top of the page in bold font.

Authors: List all authors, indicate different affiliations using superscript letters or symbols after each name, if appropriate. The presenting author's name should be Underlined.

Affiliations: List the full address(es) of each institution in italics.

Email: Optional, but recommended, include the email address of the senior author. You may also include a telephone number. Indicate the corresponding author with an asterisk.

Abstract body: The main text should be clearly legible. Please do not use a font smaller than 11pt. Indicate references in the text as numerals within square brackets e.g. [1] with the corresponding source cited at the foot of the document.

Figures and graphs: Illustrative material may be included, either inset within the flow of text or below. Figures should be numbered and referred to in the text, as appropriate. A brief description should be given in the figure legend.

References: These should be numbered and appear below the main body of the Abstract.

File formats: The preferred filetype is Adobe™ portable document format (.pdf), however we will accept Microsoft™ Word (.doc or .docx) and rich text (.rtf) files. File names: Please only use unaccented Latin characters (ABCabc..), Numerals (123..) and the underscore character (_) in filenames. Include the 3 letter extension after a dot (period). For example: abstract_1.pdf
If you intend to upload more than one abstract, please ensure that each has a different filename to avoid overwriting a previously uploaded document.

Sample document: A sample abstract for reference can be downloaded from:
